SKILLS

BACKEND & INFRA

Go • Python • TypeScript

Docker • GitHub Actions • ScyllaDB

BLOCKCHAIN

Solidity • Foundry • EVM

AI & TOOLING

LangChain • OpenAI API • PyTorch

Transformers • Hugging Face

DEVELOPER TOOLS

Bash • Linux • Cursor

OpenClaw • Opencode

AWARDS WINS

HACKATHONS

EIGENLAYER MICROHACKS 2024

5th place, TriggerX keeper MVP

TRON HACKATRON S7

2nd place, Community Track, DeFi

ARBITRUM OPENHOUSE 2025

3rd place, with TriggerX on Arbitrum One

RECOGNITION

• Best Performer of Q3, 2024

• x10 Workplace Wizard

PUBLIC WORK

• 6+ talks and public technical sessions

• Featured by Talent Protocol on the NYC Times Square

EXPERIENCE

LAMPROS TECH | BACKEND + BLOCKCHAIN DEVELOPER

June 2024 – Present | Ahmedabad, Gujarat

- Backend engineer for blockchain infrastructure, automation services, and developer tooling. Builds Go/Python backends, Solidity integrations, and deployment pipelines for early-stage teams.
- Part of Lampros DAO, working on seminars and workshops in colleges.

VL2G, IITJ | RESEARCH FELLOWSHIP

Jan 2024 - Jun 2024 | IIT Jodhpur

- Worked under the guidance of Dr. Anand Mishra, at VL2G labs.
- Did early research and trials for SildeGen paper.

WICTRONIX | FRONTEND DEVELOPER

May 2023 - Jul 2023 | Surat, Gujarat

PROJECTS

TRIGGERX | CORE CONTRACTS + BACKEND DEVELOPER

Jun 2024 – Mar 2026 | EigenCloud + Ethereum/Arbitrum One

- A decentralised automation platform for blockchain operations, centred on scheduled and condition-driven task execution across on-chain and off-chain systems.
- Helped take TriggerX from an early keeper-network prototype to public testnet and mainnet releases, ecosystem partnerships, and operator traction before the project was wound down.
- TriggerX reached \$2B TVL on Arbitrum One.

FLOWFORGE | BACKEND DEVELOPER

Jan 2026 – Mar 2026 | TriggerX / ChainLink CRE

- A workflow product for Web3 users who prefer chat and visual composition over direct protocol interaction. Users can sketch flows on a canvas or talk to a Telegram bot while the system handles the underlying integrations. Uses TriggerX / ChainLink CRE as execution layer for reliability.
- Built the initial product, Telegram bot workflow, and ChainLink CRE-backed execution layer.

PPTGEN | RESEARCH FELLOW @VL2G

Jan 2024 – Jun 2024 | IIT, Jodhpur

- Designed an automated generation pipeline for a synthetic dataset, pptGEN. The aim was to create a large synthetic slides dataset for Lecture Slides Understanding.
- Used OpenAI API calls, along with langChain to generate lecture slides.
- Slides covered 4 subjects (Phy, Mat, CS, Eco), and multiple visual (graphs, tables, flowcharts) and textual elements.

LAMPROSDAO WORKSHOPS | SPEAKER @LAMPROSDAO

Dec 2024 – Present | Lampros Tech

- Lampros DAO has done multiple seminars and hands-on workshops to onboard college students to Web3 and blockchain developer experience.
- Participated in X broadcasts, covering technical dives into Ethereum's EIP workings and Fusaka update.
